# Brick by Brick Project

## What is the brick by brick project?

In order to achieve our vision of building a standard elementary school and an educational ecosystems that provides access to education for 3000 students, we need to develop the right assets to support this. The construction of classrooms and dormitories, developing a robust team of qualified native leaders, and forging strategic partnerships is imperative to rolling out effective educational, health, and sustainability programs.

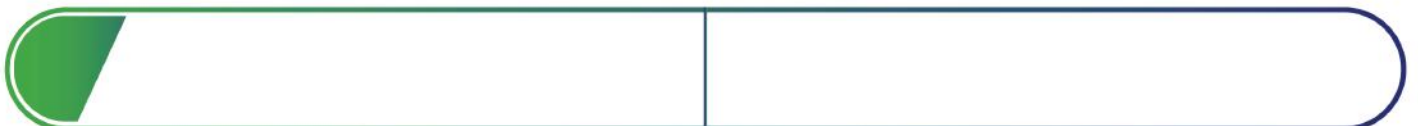

Be a part of Brick by Brick Project and help build a classroom at Hope Ndoto Africa Elementary School.

For every \$0.33USD raised, 1 brick is added to the classroom construction at Hope Ndoto Africa Elementary School.

**Our goal is to raise \$ \_\_\_\_\_ to build classrooms in Uganda.**

Track progress by shading in the bar below based on the fundraising goal.

7,500 bricks = 1 wall  
30,000 bricks = 1 classroom

Keep going!

Yay! We've reached halfway!

Woohoo! We did it
